Hochmosel Crossing

Building project: The construction to be built in the administrative county Bernkastel-Wittlich at the Moselle is a project of superlatives: With Hochmosel Crossing, in some years' time one of the largest bridges in Germany can be admired.

With a height of 158 meter, the construction will span 1.7 kilometres across the Moselle valley. At this, the Hochmosel Crossing is only a short piece of a large-scale project, i.e. the long-distance road link with which the Belgian/Dutch North Sea ports as well as the Belgian conurbation areas are linked to the Rhine-Main area.

Construction time: approx. 2008 - 2016

Construction costs: € 450 million

Builder: PORR Deutschland GmbH
Eiffage Stahlbau Technologie

Processor: PORR Deutschland GmbH

Design: **PAGEL® V1/50,**
Bridge bearing
